web development projects

Date Night :: seanmartinlewis.github.io/date-night/
A single page application that allows users to select a genre of food and movie. The use then gets a random movie and recipe and can choose next on either category. The user can log in and save dates. User can then comment on and view other dates users have saved. Node, MongoDb, Mongoose, jQuery and MLAB.

SCOREKEEPR :: github.com/seanmartinlewis/scorekeepr
A React Native iOS mobile app used for taking score of spades and custom single and multiple scoring games. The user can add players, set rounds, see the rules and set a timer. The user can also set round winning number and alert user when game is won.

Poem Drop :: github.com/seanmartinlewis/poem-drop
A single page application built with React and implementing React Router. This app allows users to log in with G-mail and write poems with the aid of a thesaurus API call. User can store and edit, make public and delete poems. Backend database built in rails.

Tic Tac Toe ::seanmartinlewis.github.io/tic-tac-toe/
A fully functional tic tac toe board created with HTML, CSS and jQuery. Tic Tac Toe alternates users and keeps track of wins. Users are able to reset board and game count.

web development skills

Javascript	Node.js	Responsive	Ajax / Axios
Ruby	Express	React	Redux
SQL	Ruby on Rails	React Native	GitHub
HTML	MongoDB	Angular	Heroku
CSS	M-lab	jQuery	Git
